

A comprehensive healthcare sanctions solution from a trusted partner

I-MED™ is the highest quality healthcare sanctions solution in the market, delivered by a true partner who will never compete with you

The most comprehensive and current sanctions and exclusions

I-MED examines thousands of state and federal sources to identify healthcare providers with histories of disciplinary actions or disqualifications. I-MED is continuously updated with new records at a rate of more than 1 million new records each month.

As a trusted partner, we won't ever be bidding against you for business. **Our focus on data quality and partnership makes I-MED the best choice for CRAs looking for a healthcare sanctions solution.**

Benefits of I-MED

Detailed source information is always available, allowing you to field better questions, make good decisions on product positioning, and provide your customers with a high level of service.

All I-MED solutions exceed the best practice requirements for screening and exclusion of parties as established by the OIG in the 2013 *Special Advisory Bulletin on the Effect of Exclusion from Participation in Federal Health Care Programs*.

I-MED Alias combines our sanctions database with our address history search to identify records that might otherwise require multiple searches to uncover—or be missed altogether.

I-MED Monitoring

A traditional search of I-MED's database reveals previous sanctions and exclusions. To further mitigate workforce risk, I-MED's real-time monitoring solution delivers alerts of new relevant records within 24 hours.

WHY CHOOSE I-MED?

 **Partnership**

True wholesale provider; no competitive risk

 **Transparency**

See our fully disclosed source list at any time

 **More Records**

Sanctions and exclusions are added at the highest rate in the industry

 **Timeliness**

New records are added directly into the database, bypassing the typical monthly refresh queue
